## More about Me

List of institutes that I was teaching at: (in chronological order)

- Hong Kong University of Science and Technology (HKUST)
  - Department of Computer Science and Engineering
  - Department of Accounting
- Nanyang Technological University, Singapore (NTU)
  - Department of Computer Science, School of Computer Engineering
- Hong Kong College of Technology
  - Department of Computer and Information Technology (HKCT)
- Community College of City University (CCCU)
  - Division of Applied Science and Technology
- Hong Kong Polytechnic University
  - School of Professional Education and Executive Development (SPEED)

Now, I am once again serving CSE, HKUST

You are welcome to talk to me if you have any questions about further study and/or career development!

# Teaching Assistants

#### Full-time IA

- CHANG, Bing Yen
  - Office: Rm 2532
  - E-mail: bychang@ust.hk
  - Office hours: To be confirmed

#### Postgraduate TAs

- CHAN, Tsz Ho
  - Office: CYT-3007
  - E-mail: tszho.chan@connect.ust.hk
  - Office hours: To be confirmed
- CHUNG, Tsz Ting
- Office: CYT-3007
- E-mail: ttchungac@connect.ust.hk
- Office hours: To be confirmed
- FUNG, Nai Chit
  - Office: None
  - E-mail: ncfung@connect.ust.hk
  - Office hours: To be confirmed

## Postgraduate TAs

- HUANG, Zeyu
  - Office: Rm 4203
  - E-mail: zhuangbi@connect.ust.hk
  - Office hours: To be confirmed
- PAK, Chan Ho
  - Office: Rm 4208
  - E-mail: chparkaa@connect.ust.hk
  - Office hours: To be confirmed
- RAO, Zhefan
  - Office: Rm 4208
  - E-mail: zhefan.rao@connect.ust.hk
  - Office hours: To be confirmed
- XU, Ruijia
  - Office: TBD
  - E-mail: rxuag@connect.ust.hk
  - Office hours: To be confirmed

#### Lectures

- Section L1 (Dr. TSOI, Desmond)
   Wednesday/Friday, 1:30pm 2:50pm,
   Zoom/Rm 2465 (Real-time Online Mode/Mixed-mode Lite later)
- Section L2 (Dr. TSOI, Desmond)
   Monday 1:30pm 2:50pm, and Friday 9:00am 10:20am,
   Zoom/LT-K (Real-time Online Mode/Mixed-mode Lite later)
- Section L3 (Dr. TSOI, Desmond)
   Wednesday/Friday, 4:30pm 5:50pm,
   Zoom/ CYT-G010, (Real-time Online Mode/Mixed-mode Lite later)

- L2: Mon: https://hkust.zoom.us/j/91235842922?pwd=RWR2VnJrY3dCN1pLY2t5TzN3Z1ZnUT09
   Fri: https://hkust.zoom.us/j/98011527279?pwd=d3JSMGFFUnp1NVRXdnhSYkRtL0FRdz09
- L3: https://hkust.zoom.us/j/93395605894?pwd=S21qSVhkWFdudGVMR2grei8vcTdPZz09

Rm 3553 desmond@ust.h.

OMP 2211 (Spring 2022)

.

For those who are not on campus or not in Hong Kong, when attending a lecture Zoom meeting, make sure to set up your screen username to:

LASTNAME Firstname studentusername E.g., CHAN Tai Man (ctaiman)

 During a Zoom lecture meeting, please remain muted in order to avoid background noise

 If you have questions, click "Raise hand" and you will be unmuted to speak

Raise Hand

 You can also use the Chat function to post questions and comments

 Try to join the meeting with your camera turned on as this helps create a more interactive online class experience

I will start the Zoom meeting 5 to 10 minutes earlier. :)

Labs

Section LA1

Wed, 11:00am - 12:50pm, Zoom (Real-time Online Mode throughout the Semester)
Zoom Link: https://hkust.zoom.us/j/98076383894?pwd=N2NZSUJIdi9pVUlQb3E0LzZqNkNPdz09

Section LA2

Tue, 3:00pm - 4:50pm, Zoom (Real-time Online Mode throughout the Semester)
Zoom Link: https://hkust.zoom.us/j/97305140488?pwd=SGZXdGNFL1BOaXR1UTlTdHRhYWJidz09

Section LA3

Mon, 3:30pm - 5:20pm, Zoom (Real-time Online Mode throughout the Semester)
Zoom Link: https://hkust.zoom.us/j/99148863647?pwd=dlV0YXI5c1E2Nmw40GJmQW9vdWdHUT09

Section LA4 (This session will have no scheduled meetings)
 You will be provided with access to video-on-demand recordings of the weekly lab material which you will follow at your own pace.

Check the lab page in the course website: https://course.cse.ust.hk/comp2211/

#### Labs

#### Note

- There will be no labs in the first two weeks (February 7, 8, 9 & February 14, 15, 16).
- The first lab starts in Week 3 (February 21, 22, 23).

Rm 3553, desmond@ust.hk

COMP 2211 (Spring 2022)

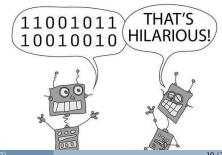

0 (00

When attending a Zoom lab meeting, make sure to set up your screen username to:

LASTNAME Firstname studentusername E.g., CHAN Tai Man (ctaiman)

During a meeting

If you want to talk to your TA, "raise your hand", the TA will answer your questions. If you need to share your screen, the TA will place you in the "Private Discussion Room" and go in temporarily to handle it. TA will follow chronological order when handling the raise hand request.

Rm 3553, desmond@ust.hk

MP 2211 (Spring 2022)

## Important Notes about the Labs

- 10 lab exercises will be given to consolidate your understanding of course materials.
- Only 5 labs will be graded. Tentatively, they are Lab 2, Lab 4, Lab 6, Lab 8, & Lab 10.
- Although we do not expect you to finish the lab exercises before you attend the lab, we expect you to have read the lab's materials and understand what you are required to do.
- 2 points for each graded lab.
- To get point/partial point for the lab, you are required to finish the requirement/program and submit it to ZINC (automatic grading system) on or before 23:59 on Friday of the lab week. No late lab assignment will be accepted.
- Materials will be released around a week before the lab.
- Holiday policy.

### Course Description

- The course consists of, per week
  - 3 hours of lectures
  - 2 hours of lab

and it gives 3 credits for successful completion of the course.

- Prerequisites
  - COMP 1021 Introduction to Computer Science OR
  - COMP 1029P Python Programming Bridging Course
- Exclusions (24 Courses)
  - COMP 3211 Fundamentals of Artificial Intelligence
  - COMP 4211 Machine Learning
  - COMP 4221 Introduction to Natural Language Processing
  - COMP 4331 Data Mining
  - COMP 4332 Big Data Mining and Management
  - COMP 4421 Image Processing
  - COMP 4471 Deep Learning in Computer Vision

m 3553, desmond@ust.hk COMP 2211 (Spring 2022) 11/29 Rm 3553, desmond@ust.hk COMP 2211 (Spring 2022) 12/2

- Exclusions (Continued)
  - COMP 4901K Machine Learning for Natural Language Processing
  - COMP 4901L Foundations of Computer Vision
  - ELEC 4130 Machine Learning on Images
  - ELEC 4230 Deep Learning for Natural Language Processing
  - IDPO 4110 Practical Machine Learning
  - ISOM 3360 Data Mining for Business Analytics
  - MATH 4336 Introduction to Mathematics of Image Processing
  - MATH 4432 Statistical Machine Learning
  - RMBI 4310 Advanced Data Mining for Risk Management and Business Intelligence
  - COMP 5211 Advanced Artificial Intelligence
  - COMP 5212 Machine Learning
  - COMP 5213 Introduction to Bayesian Networks
  - COMP 5221 Natural Language Processing
  - COMP 5222 Statistical Learning Models for Text and Graph Data
  - COMP 5223 Perception and Information Processing for Robotics
  - COMP 5331 Knowledge Discovery in Databases
  - COMP 5421 Computer Vision

Rm 3553, desmond@ust.hk COMP 2211 (Spring 2022)

### Course Objectives/Aims

- This course
   aims to give a gentle introduction to the basic elements of artificial
   intelligence (AI) through understanding examples from various
   applications and hands-on experimentation using AI software tools.
- In addition to covering the technical aspect of AI through such topics as search and problem solving, knowledge representation, probabilistic reasoning, machine learning, computer vision and image processing, speech and language processing, and robotics, this course will also study the historical perspective, social and ethical implications, as well as potential and limitations of AI.

#### In short

COMP 2211 gives a gentle introduction to the basic elements of AI. It also studies the historical, social and ethical implications, as well as potential and limitations of AI.

553, desmond@ust.hk COMP 2211 (Spring 2022)

# **Topics Covered**

- Brief history of Artificial Intelligence
- Search and problem solving
- Knowledge representation
- Probabilistic reasoning
- Machine learning
- Computer vision and image processing
- Speech and language processing
- Robotics
- Social and ethical implications of AI
- Potential and limitations

# Keyword Syllabus (More Exact Topics)

- Brief History of Artificial Intelligence
- Naive Bayes
- K-Nearest Neighbour
- K-Means Clustering
- Perceptron and Multi-Layer Perceptron
- Fundamentals of Image Processing
- Convolutional Neural Networks
- Minimax and Alpha-beta Pruning
- Reinforcement Learning (Value Iteration)
- Artificial Intelligence Ethics

m 3553, desmond@ust.hk COMP 2211 (Spring 2022) 15/29 Rm 3553, desmond@ust.hk COMP 2211 (Spring 2022) 16/29

## Intended Learning Outcomes

On successful completion of this course, you are expected to be able to:

- 1. Demonstrate understanding of the historical perspective and development of artificial intelligence (AI)
- 2. Demonstrate understanding of the basic elements of Al thinking
- 3. Demonstrate proficiency in applying basic principles and techniques of AI and using AI software tools to solve problems in a range of applications
- 4. Demonstrate awareness of the social and ethical implications as well as potential and limitations of AI

# Tentative Teaching Schedule

Topic	# Lectures	Cumulative # Lectures
Introduction to Artificial Intelligence	1.5	1.5
Python Programming Fundamentals for Al	2.5	4
Naive Bayes	1.5	5.5
K-Nearest Neighbour	1.5	7
K-Mean Clustering	1.5	8.5
Perceptron	1	9.5
Multi-layer Perceptron	3	12.5
Fundamentals of Image Processing	3	15.5
Convolution Neural Networks	2.5	18
Minimax and Alpha-beta Pruning	3	21
Reinforcement Learning (Value Iteration)	4	25
Al Ethics	1	26

#### Note

- The schedule is subject to change according to the teaching and learning progress!
- Makeup/Additional classes will be offered
  - L2: May 2 (Monday): The day following the Labor Day
  - L2: May 9 (Monday): The day following the Birthday of Buddha

# Grading Scheme

#### Assessment breakdown:

- Coursework (40%)
  - Lab Exercises (10%)
     10, but only 5 of them will be graded, 2% each
  - 2 Individual Programming Assignments (30%)
- Examination (60%)
  - Mid-term Exam (20%)
  - Final Exam (40%)

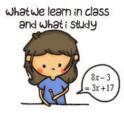

Coursework (40%) + Examination (60%) = Total (100%)

#### Note

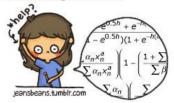

No make-up exams will be given unless under very unusual circumstances, e.g., sickness, with letters of proof

### Midterm Exam

- The midterm examination is scheduled on April 2, 2022 (Saturday), 2pm - 4pm
- Venue: To be confirmed

whats actually on the test

## **Academic Dishonesty**

- Anyone "both the copier and the copiee" caught cheating on their assignments will get zero marks for the assignment.
- In addition, they BOTH will get an additional 10% deduction from the final grade for the first time of cheating. Anyone get caught for cheating in an assignment for the 2nd time will get an immediate FAIL grade.
- On the other hand, anyone caught cheating in the final exam will get a FAIL grade immediately.
- There can be additional disciplinary actions as well from the department and university.
- Links:
  - University's Honor code: http://ugadmin.ust.hk/integrity/student-1.html
  - University's Penalties for Cheating: http://ugadmin.ust.hk/integrity/student-5.html

### Academic Dishonesty (Cont'd)

 We will use a software to check your codes with others' program, and even with previous assignments. The tool is hard to beat. The suspected cases will be further studied by the instructor and the TAs.

# If you are not sure what is considered plagiarism

- DO NOT copy program codes from another student/person.
- DO NOT look at the actual program codes of another student.
- DO NOT share actual program codes with other students/people (by paper, emails, blogs, FB, Google Doc, etc.).
- DO NOT give your program codes to other students who ask for it, and do not ask for a copy of their code either.
- DO NOT post your program codes anywhere online.
- DO NOT leave your finished/unfinished program codes unattended.
- While we encourage discussion among students, you have to write codes on your own.
- During discussion, you SHOULD NOT go to the details such that everyone will end up in the same code.

The list is by no means exhaustive, and you will need to use your own discretion.

#### How Hard Should I Work?

- Some people say that a 3-unit course takes 8 hours/week.
- Guideline:
  - Pre-study (1 hour): what topic/materials will the coming lecture be covering?
  - Attend class (3 hours): The A+ students tell you that they pay FULL attention in class and try to understand everything in the class so that it is easy to review the class materials.
  - Attend labs (2 hours)
  - Post-study (2 hours): Re-reading the notes, book reading.

That's all!
Any question?

Welcome Back!
