

Table of Contents

- Lecture 01: Introduction to Cryptography
- Lecture 02: One-Key Block Ciphers
- Lecture 03: Design Ideas of One-Key Block Ciphers
- Lecture 04: The Advanced Encryption Standard
- Lecture 05: Modes of Operations for Block Ciphers
- Lecture 06: Key Management for One-key Ciphers
- Lecture 07: Introduction to Public-Key Cryptography
- Lecture 08: The RSA and ElGamal Public-Key Cipher
- Lecture 09: Public Key Infrastructure (PKI)
- Lecture 10: Homomorphic Encryption
- Lecture 11: Hash and Keyed Hash Functions
- Lecture 12: The Secure Hash Algorithm

- Lecture 13: Protocols for Security Services
- Lecture 14: Digital Signature Standard
- Lecture 15: Secret Sharing Schemes
- Lecture 16: Electronic Mail Security
- Lecture 17: Kerberos Authentication in Distributed Systems
- Lecture 18: IP Security (I)
- Lecture 19: IP Security (II)
- Lecture 20: IPSec Key Management Protocol
- Lecture 21: Web Security: SSL
- Lecture 22: Firewalls
- Lecture 23: Secure Shell
- Lecture 24: Virtual Private Networks
- Lecture 25: Anonymity on the Internet
